

INSTALLATION TOOL

60 OD pipe (not 50 mm-60.03 mm) Used to position ground socket and check alignment from standing position

\$40.00 EA

FOOT REMOVAL TOOL

To remove flattened posts and modified items with pin inserted near base (see below)

\$50.00 EA

REMOVAL TOOL

Removal Tool is required to remove items from ground socket (sheared post attachment included)

\$250.00 EA

SET OF TOOLS

Installation tool, Removal Tool (sheared post attachment) and foot removal tool (remove flattened posts)

\$300.00 PACK

You can alter the locking capacity of the Taper by moving it up the post (as it moves up the post the locking capacity is reduced). If you move the Taper up around 10 mm items remain firm in socket but become removable by hand. If you would prefer to use the foot tool and you are handy enough - you can insert a steel pin near the base of the item (all the way through to provide adequate leverage) and use the simple foot tool to lever items from the ground socket.

Buy once and reuse for a lifetime.
Go ahead, use me again and again - you'll never break me!

- Provides over 200kgf in both directions
- Ergonomic Tools
- Worksafe Award DOH&S
